## Operating a Liberty PA speaker system

### Set up instructions:

- 1) Make sure the power switch on the speaker is off
- 2) Turn "Mic 1", "Mic 2" and "Aux" volume knobs down all the way, and turn "Bass" and "Treble" knobs to 12 o'clock
- 3) Using the diagram above, connect mic, iPod and/or extra non-powered speaker
- 4) Plug speaker power cable into a wall outlet
- 5) Turn speaker power on
- 6) While someone is speaking into the mic, slowly raise the "Mic 1" volume knob
- 7) While the iPod is playing and its volume is set at 50%, slowly raise the "AUX" volume knob

### Tips:

- To avoid feedback (screeching sound), keep the mic positioned behind the speakers
- Always plug the speaker power into a wall socket...don't use the speaker's internal battery
